

Safe Integrated Automation

BS EN ISO 9001:2000 - Quality Policy

The Company

PILZ Automation Technology is a subsidiary of PILZ GmbH. The business was started in the UK in July 1987 and is based on the Oakley Hay Business Park in Corby. It now employs 27 personnel (March 2007) and has an annual turnover of £4.2 million (April 2006). In the UK the company imports and sells products from the Parent Company, based in Germany, and operates as a separate profit centre.

Mission Statement

To become the most efficient UK supplier of industrial electronic control products.

Our Commitment

Top Management ensure that the Quality Policy is appropriate to the purpose of the Organisation, is regularly reviewed for suitability and is communicated to all members of staff.

Our Quality Management System is designed to support the Organisation's efforts to achieve the above Mission Statement and to comply with the requirements of ISO9001:2000.

Management, in their commitment to comply with the requirements of ISO9001:2000 provide the means to achieve quality targets and is responsible for the training; continuing education and motivation of employees in the promotion; continuous improvement and effectiveness of the quality system.

Appropriate Quality Objectives are set; monitored and measured with major deviations from prescribed targets being communicated to members of the Management Team.

The Organisation, as a whole, is committed to monitoring customer satisfaction with a view to meeting, and where possible, exceeding their expectations.

Responsibility for Quality

The Quality Manager, along with the Quality Administrator, is responsible for developing and co-ordinating all quality assurance measures.

The quality of the Company, and excellence of product, results from the co-operation amongst all employees, both within the United Kingdom and at other International locations.

Employees are responsible for the quality of their own work and urged to be vigorous in the pursuit of quality.

Continual Improvement

Errors or discrepancies found during quality control inspections, or customer complaints / product defects, are immediately brought to the notice of relevant Quality personnel. Where urgent corrective / preventive action is required, the necessary instructions are immediately communicated to appropriate personnel.
